" ELECTRO

RAILROAD TO ELY, NEV., COPPER CAMP

Surveys Have Been Completed And Grading Contracts Will Soon be Let.

CENERAL MANACER REQUA HERE

Road Leaves S. P. at Toano-Big Mills And Smelters Projected for White Pine County District.

Work will soon be started on the raffroad which is to connnect the Copper camp of Ely, Nev., with the out side world. The surveys are all completed and now General Manager M. L. Requa, of the Nevada Consolidated Mining company, which is to finance the new line, is only waiting for the signal to proceed; when he will ad-Nertise for bids and award the first contract for the grading. The total length of the line will be 140 miles, and it will connect with the Southern Pacific at Toano. It is to be known as the Nevada Northern. It is expected, said Mr. Requa at his room in the Knutsford today, to have the road in operation within five months after the grading commences, which means that trains will be running into Ely soon after Jan. 1, 1908. There will be noth-ing difficult about the construction of the road, as there are no heavy grades to encounter, no heavy cuts to be made following down the Steptoe valley the whele distance. It will furnish a rail outlet for Cherry Creek, Spruce Mountain and other eastern Nevada mining camps.

BIG MILLS AND SMELTERS.

Soon after the completion of the rail-road the Nevada Consolidated will commence the equipment of its mines with extensive reduction works. To begin with a massive concentrator will be built, the first unit having capacity for the treatment of 1,000 tons of ore per day. This will be followed later by a smelter.

A GREAT COPPER CAMP.

Of the camp of Ely, Mr. Requa-speaks enthusiastically and is san-guine it is going to make one of the greatest copper camps in the country, "There is not much hot air about Ely," he declared, "for we have the Ely," he declared, "for we have the ore and plenty of it to back us up.
"Joseph L. Gireaux," continued Mr. Requa, "says we are going to have the greatest copper mining district in the world. I am not prepared to make that assertion, yet I am satisfied it will be big enough for anybody."

The Gireaux Copper company is pre-

big enough for anybody."

The Gireaux Copper company is preparing to install a large smelting plant and already has a great deal of the material on the ground.

Ely is ideally located for a mining camp. First of all, it has an abundant water supply; the Nevada Con. has water supply; the Nevada Con. has that amount of stock has been sold.

enough to run a 5,000-ton contended and in addition to that used for domestic purposes. The climate is first rate, being neither too hot nor too cold, being neither too hot nor too great being neither too hot nor too cold. There is some snow, but not a great deal in winter. The fuel problem is the worst item the citizens have to contend with, but for several years to come there will be enough wood in the mountains to supply all needs; however, with the railroad built into camp, coal can be brought in from the mines of Utah and Wyoming. Ely is tributary to Salt Lake and will draw its supplies from this city. plies from this city.

Mr. Requa left for San Francisco

ON MINING EXCHANGE.

Lower Mammoth Active and Stranger-Closing Quotations.

The forenoon sales on the mining exchange today aggregated 4,000 shares, for which was paid \$1,050.

Outside of Lower Mammoth, only three stocks participated, they being Carisa, New York Bonanza and Silver Shield. Lower Mammoth was quite active and stronger. The closing quotations and sales were

A. J. Betties, chief metallurgist of the A. J. Bettles, chief metallurgist of the Newhouse mines, was connected with the Bimetallic and Granite Mountain for a period of 13 years, and was in charge of the milling department when the first bar of bullion was turn-ed out and when the first dividend was paid in 1884. Dividends were kept up for several years some mounts runone of the largest if not the greatest high grade ore mine in the world. It is even estimated that it has practically in sight, though not fully blocked out, approximately \$50,000.000 of gross val-ues, including one very large ore body for several years, some months run-ning as high as \$200,000.

Mr. Bettles left the Bimetallic and Granite Mountain to become attached to the staff of Samuel Newhouse, about

0 years ago.

NEW IDAHO DISTRICT.

Parker Mountain the Scene of Quite a Without doubt the richest ore ever

scarce. The New York interest who was the larger buyer at \$40 to \$42.50 is not sellip on the advance. There is reason for the belief that the insiders consider Utah worth a very great deal more than its present price. discovered in this portion of Idaho was found on the 30th of last month by Thomas J. Kerr and Duncan Williams of Challis, says the Messenger of that place, at what is known as the Parker mountain district, on Warm Spring creek, 22 miles northwest of Challis. It is probably in Lemhi county, although the line between Lemhi and Custer counties does not make it positive as to which county it is in. Several claims have already been located, and the excitement here is great, which reminds one of early-day mining in reminds one of early-day mining in the west. The town here is nearly deserted of its male population—everyone that could possibly get away has rushed to the new Eldorado.

Mineral was first discovered at Parker mountain last fail by the late Ed.

ocated a few claims at that time. The listrict is easy of access and can be eached in eight hours from Challis offices in the Commercial building, but "for rent" signs appear in the windows and the present headquarters are not with pack animals, and there is a good wagon road eight or nine miles of the distance. The new district is in the mineral zone of Estes mountain, Loon creek and Thunder mountain.

SEVIER CON. MILL. ontracts Let for Material and Equip-

P. L. Kimberly estate for heavy damages for some transaction involving the Balaklalia mie in California. In local mining circles the sult instituted by the St. Louis concern was looked ment of New Plant. The Sevier Consolidated Mining company, through its manager, R. W. Foster, has placed orders for the material and equipment for its proposed mill. and equipment for its proposed mill.

The equipment will consist of 18 Merrill stamps of 1,200 pounds weight, the
same dropping at the rate of 125 per
minute. After crushing, the ore goes
to the concentrating tables and what
values are not saved there are caught
through the means of the Godbe cyanutsersees. Anaconda has been attached to the nide process

staff of the Bingham Consolidated, succeeding W. H. Nutting, as smelter was expected the plant will be eady for operation not later than Dec. . It will have capacity for the treat-nent of from 100 to 125 tons of ore per It has not been generally known, but

Mr. Nutting, who has served the Bingham from its very inception faithfully and efficiently, tendered his resignation several weeks ago and it was with not a little reluctance that it was Manager Foster and Consulting En-gineer Edward B. Jones will leave for with not a little reluctance that it was accepted by General Manager Mc-Vichle. amp tomerrow morning.

FOR LAS VEGAS.

Town Steadily Increasing in Population and Being Rapidly Built Up.

BULLFROG FREIGHT BUSINESS

Residents of Vegas Will Get in on Uintah Reservation - Other Movements.

Special Correspondence.

Las Vegas, Nevada, Aug. 1.-Las Vegas is certainly on the increase both n size and in population. The San Pedro road is responsible for most of the prosperity. The company has shown an untiring diligence in building this town up to the proportions of city, and for the future these is no doubt but what it will be the metropolis of all southern Nevada. Among the substantial improvements

s the large 40-stall roundhouse now fast nearing completion, the coal sheds and tanks for storing oil for the big oil burners being run over the Los Angeles end of the line running out of this city. The next permanent strucure that will command the attention of Mr. Whittemore and Supt. Jones, will be the building of the machine shops, which promise to be the largest

shops, which promise to be the largest and best in the state.

The freight business into Bullfrog and the mines adjacent thereto from this point has not been as heavy as it now is for menths past, and the reason assiged is that the merchants over there are more than overstocked and that the commodities of life in that market have almost become a drug. The teams were drawn off and that has had a tendency to dampen the ardor and that has had a tendency to dampen the ardor of business men even here, but this will not last long, as freight must go into those rich mines and it is now generally admitted br all that the best, shortest and most feasible route into the mines of that locality is by way of this city.

"RAG TOWN" VANISHING.

Old "Rag Town," or what is more familiarly known as the "McWilliams townsite, is nearly off the map. This is the town that existed before the San Pedro company opened up the present townsite to the public. There are a few of the business houses, salicons, stores, and other places of business there yet, but it will not be long before they, too, will be counted among the population of the new town. A great many of the people who located there built comparatively fine buildings for this desert country and they did not believe that the town would ever be not believe that the town would ever be moved from the McWilliams' site, but their minds were soon disabused, for it was not long before building after building, together with those temporary rag structures all commenced to wand r towards the new townsite on wheels.

A number of our people have joined in with the Ulntah reservation stampeders, many of whom are already at Provo, where they have gone to register in the hope of winning the first choice in the selection of those lands. This part of the country will furnish more than its quata for all express an nore than its quots for all express an incertainties of this gigantic game of

MINES OF GOOD SPRINGS. The Good Springs country, only 35 miles distant from Vegas, is coming to the front. This mineral district was quite prominent about 10 years ago, that was when the transportation of sulphile ores other than gold and sliver was an impossibility, but things are different now, and with the railroad facilities now at hand, this district

facilities now at hand, this district promises to be up in the front rank at no listant date.

The life has not been squeezed out of Crescent, nor will it be. This mining district, had a range during the local district had a run during the last month, but the fact of the matter is the mines were too close to the line of railroad. The adventurers could get in on one train and then if things were not satisfactory they could get out on another. Crescent soon had several rag dumps in evidence, but it never did approach the magnitude of a very large town. The leads are large and well defined. The surface indications are defined. The surface indications are sufficient to warrant anybody sinking on any of them with hope of reward, but only depth will ever demonstrate the permanency of Crescent as a proserous mining camp.
The Las Vegas Land & Water com-

pany has been laying curbing on all the streets of the city and it is of a substantial character. Everybody speaks highly of the way the townsite company is endeavoring to comply with very promise it made before a lot was

COMING TO SALT LAKE.

Editor Frank L. Reber of the Las Vegas Times will shortly visit his fam-ity, who are temporarily residing in Salt Lake. He will be accompanied by James Brown of the same paper, who, together with Mr. Reber, will register at Provo for a chance on some of the Lintan reservation lands. J. A. Mc-Kenna, one of our prominent business men, lett for Provo Monday, so as to be in at the opening of the proceedings.

The Cleveland Lumber & Grain company of Salt Lake has sold out its The Cleveland Lumber & Grain company of Salt Lake has sold out its business in this city and has returned to Salt Lake.

J. F. Miller of the Hotel Nevada of this place, who has been conducting his business in temporary quarters since the opening of the railroad townstee has his plans drawn for a two-

since the opening of the railroad townsite, has his plans drawn for a twostory building, 65x50 feet, and his visit

county, Cal. It will be a substantial
structure of brick, stone and fron.

A. T. Cope of the Cope-Shepherd
Lumber company will leave in a few
days in company with his family on a
visit to relative and friends among
the lumbering fields of Michigan.

There is a steady but continuous
train of prespectors and burros wending
their way into the El Dorado mining
district hoth from this direction and up
the Colorado river. There promises to
be a stampede into that mining locality
shortly and in fact all prospectors have
it booked for the next rush already.

HEAT ON THE DESERT.

HEAT ON THE DESERT.

The heat on the desert has been very intense during the past month, and prospectors coming in from the respective mining centers behind burros report that it has been almost stifling. No fatalities have been reported but there has been immense suffering endured both by man and beast.

The automobiles have proven their lack of usefulness on the desert in this vicinity. There is not an auto in this country now, all having been shipped to where they are able to do better service. Every company who made an attempt to run them lost money heavily in the venture. The stagse have the

in the venture. The stagse have the travel all to themselves and even a burro looks on them now with con-

San Francisco, July 2.-Senator Clark's Salt Lake & Los Angeles, thanks to E. H. Harriman's half interest in the property, is to get freight traffic concessions in Southern California from the Southern Pacific company? This is the final outcome of the confer ence between the officials of the two roads, which have come to a conclu-This concession by the Southern Pa-

cific means assuring to the Clark road of thousands of dollars which it would otherwise have had to expend for switching tracks and freight ware-houses of its own. TRAINS DELAYED.

Strike of Telegraph Operators Hinders

Traffic at Butte. Butte, Mont., Aug. 2 .- Train No. 6

Butte, Mont., Aug. 2.—Train No. 6, known as the Burlington flyer, is reported to be tied up at a point about 25 miles east of Butte, as a result of the strike last night. The North Coast limited ran from Silver Bow to Butte without a clearance order, but proceeded very slowly, and reached this city I5 minutes late.

Twelve operators walked out in this city when the order went into effect shortly after 11 o'clock last 'night. Phones were called into use by the agent in charge of the Northern Pacific depot here, and the eastbound flyer was given a clearance as far as Livingston. The eastbound fast freight on the Northern Pacific, which was scheduled to leave Butte at 1:30 a. m. was abandoned shortly before departure time and the locomotive ordered ture time and the locomotive ordered back to the round house.

MUCH SURPRISED.

Chief Dispatcher Bottsford of Short Line Visited by His Friends.

Chief Dispatcher E. N. Bottsford of the Short Line in this city, was waited on by a number of his fellow employes of the Utah division and presented with of the Utah division and presented with a fine gold watch and fob. Mr. Bottsford was 'reposing in the bosom of his family" at his residence, 122 north Second West street, when the boys walked in on him, and for a moment he did not know whether he was afoot or on horseback. However, Mr. Bottsford set his barrings shortly welcomed his got his bearings shortly, welcomed his visitors and expressed due appreciation for the evidence of good will shown him. He is to be promoted to be train-master at Evanston, and the boys took the occasion to show their appreciation of his worth as a man and
